

Chugoku Regional Division Research of Natural Disaster Research Council

No.8

Contents

The Current Situation of the Development Plan of the Flood Control Pond in Japan 1. A Case Study of a Flood Disaster of the Ushizu River in 2019 and the Kuma River in 2020	1
Haruhiko YAMAMOTO, Hikari TSUJIMOTO, Naoki KANEMITSU	
The Current Situation of the Development Plan of the Flood Control Pond in Japan 2. A Case Study of a Flood Disaster of the Naka River by the Typhoon No.19 in 2019	5
Haruhiko YAMAMOTO, Hikari TSUJIMOTO, Naoki KANEMITSU	
Numerical Study on Effect of Plane Dam in Awano-Gawa River	9
Kotaro TANABE, Hiroyuki ASANO, Koji ASAI	
Local scour Analysis around Pier in Supercritical Flow using Shallow-Water Flow Model	13
Yuki KAJIKAWA, Fumiya KUSUMEGI	
Basic Study for the Implementation of 6 hours Ahead Water Level Prediction using Deep Learning	17
Daichi FUKUMARU, Yoshihisa AKAMATSU, Tetsuya SHINTANI, Haruka FUJII	
Study on Utilization of Colorized Disaster Phot for Disaster Prevention Education	21
Keita WAKASAWA, Koji ASAI	
Analysis of Meteorological Field Pattern of Typhoon Induce Disaster using Self-Organizing Map	25
Keigo IWASHIGE, Koji ASAI, Hajime SHIROZU, Koji NISHIYAMA	
Impact of Cyclone Seroja on Dili, Timor-Leste in April 2021: A Survey Using Satellite Remote Sensing	29
Hajime SHIROZU, Koji ASAI	
Debris and rainfall-runoff-inundation simulations for the Comoros River Basin in East Timor during the heavy rain in 2021	33
Nozomu ONAKA, Daichi FUKUMARU, Shoki EGUCHI, Yoshihisa AKAMATSU	
On Volcanic Meteorological Tsunamis by Atmospheric Shockwave due to the Eruption of Hunga Tonga - Hunga Ha'apai	35
Kenji Tanaka, Katsumi ISHIMARU	
Data analysis of Rainfall Indices on Flood and Mudslide Risk in Hiroshima Intercompared between Two Events in July 2018 and in August 2021	39
Tomohito KATSUBE, Kenji TANAKA	

Effectiveness of Small-Scale Countermeasures for Improving Safety of Evacuation Toward Combined Inundation of Debris Flows and Flood Flows	43
Takashi WADA, Masaki MARUDO, Seita HIROCHI, Hiroshi MIWA, Yoshifumi SATOFUKA	
Utilization of 3D Discontinuous Deformation Analysis for Rockfall Protection Design	47
Hiroaki KITAUCHI, Satoshi NISHIYAMA	
Features of Debris-Flow Disasters caused by Itoshima Heavy Rainfall in 1850 based on Historical Record of Shikaka Village, Itoshima in Fukuoka	51
Koji NISHIYAMA, Hiroshi HOSOI	
Proposal of a Method for Organizing Opinions through Three Workshops Issues of Sediment-Related Disaster Hazard Map Formulation Process with the Participation of Residents #3	55
Naoki MEYAMA, Hiroki MATSUMURA, Akira SAMUKAWA	
Developing a Creation Support Tool for Disaster Imagination Game Issues of Sediment-Related Disaster Hazard Map Formulation Process with the Participation of Residents #4	59
Naoki MEYAMA, Hiroki MATSUMURA, Akira SAMUKAWA	
A Study on Past Natural Disasters and Epidemics and Their Linkage in Yamaguchi Prefecture	61
Motoyuki Suzuki, Kimika Matano
